

RED DIAMOND BLADE

100% carbide coverage

Increase your production rate with this new Melfred Borzall innovation that works harder and smarter than the average blade. The Red Diamond Blade design features a single front-end domed carbide for blunt force that extends the blade's overall life. The new diamond-shaped carbides on the front sides aggressively tear through hard ground conditions and the low-profile diamond carbides near the rear help to minimize drag. The continuous perimeter of carbides give the blade a mean look with a lethal bite. Diamonds are a driller's best friend.

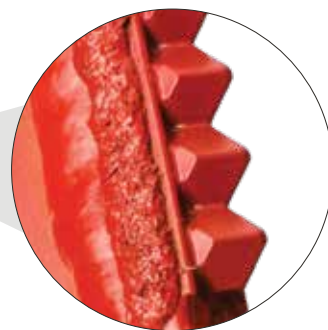

Vermeer®

6-bolt		1600-15-55-BRD

Chunky carbide hardfacing further protects all high wear areas.

Durable Domed Front Carbide

Diamond-shaped carbides on sides for aggressive cutting and 100% carbide coverage

Continuous low-profile back carbides to minimize wear

Tapered design towards the rear to reduce drag
