6 bolt, 20mm						1610-25-60-BSU3	

Center point tooth for easier penetration

Carbide cutter blocks set at an aggressive angle to get through cobble

QuickSwivel Compatible (See pg. 12)

Weld bead is reinforced with hardfacing to increase bit life

Low-profile, tapered design to minimize torque-stealing drag

Chunky carbide hardfacing the entire length of blade

Available with dome carbides for cobble and gravel

Bit of choice where directional "pushes" are difficult

HOUSINGS

DIRECT PULLBACK

BITS & BLADES

DIRECT & QUICK-DISCONNECTS
