

Full and Part-time **Paid** Positions Available Now

Internship programs are open to college students in any year as well as select high school students interested.

Real Experience with Real-world Projects

Melfred Borzall is a family-owned and operated tooling manufacturing company for the underground construction industry. We operate top-line CNC machinery and design programming. We are committed to supporting education by sponsoring school robotics teams, senior projects, class tours and providing summer internships. We offer competitive pay and often fill full-time positions from our interns.

General Requirements

Submission of resume, internship application and any relevant projects or experience is mandatory through our portal at www.melfredborzall.com/internships. We will be screening select candidates in person. Be willing to dive in and get your hands dirty with experience starting at 7:00 am! We do have a required drug screening process for all hires (at no cost). If relocating, Melfred Borzall does not reimburse for travel or accommodation.

Mechanical Design

Learn and gain experience in lean implementation, fixture design & testing, CNC programming, and other real-world projects that impact manufacturing.

Welding & Machining

Assignments will vary on experience, but may include brazing, flux-core mig welding, plasma cutting, CNC equipment operation, grinding and prep work.

Manufacturing Engineering

You will have the opportunity to have hands-on experience with SolidWorks (existing experience is a plus), tooling design, and even facility layout design.

Marketing & Creative

Video production, social media marketing strategy, graphic design, and e-commerce launch campaigns are only a few of the projects you will help develop.
